1. Unfasten the clips located near the mount.

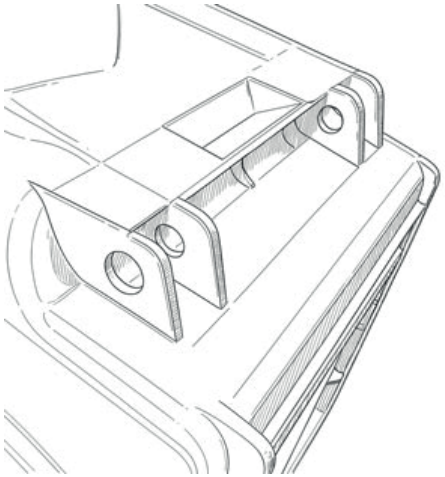

2. Position the bin flap so that it fits with the rest of the structure.

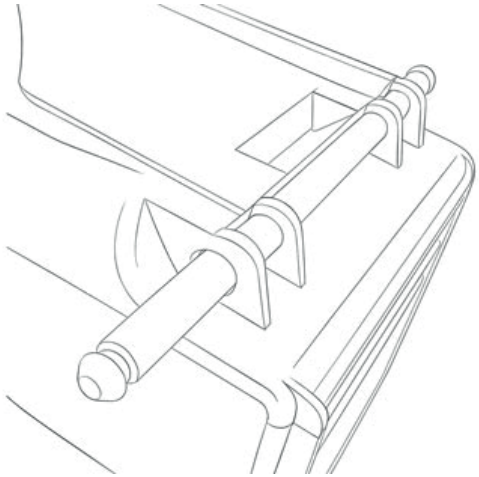

3. Insert the clips into the prepared holes on both sides.

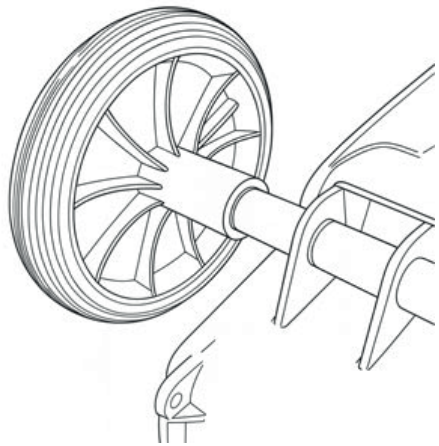

4. Push the clips all the way in so they completely cover the holes.

5. You will find additional holes on the underside of the bin.

6. Insert the metal axle into them.

7. Attach the wheel – you can gently move it to make sure it snaps into place and locks so it won't slide along the axle.
